Question a

Answer: If the cell contains a flower, the jumper will step on it. If the cell contains a rock, the jumper will turn.

Question b

Answer: The jumper will turn.

Question c

Answer: The jumper will turn.

Question d

Answer: It depends on the relative size of jumper. If the jumper is smaller(smaller row coordinate or same row but smaller column), the jumper move first and the other one will turn. If the jumper is bigger, it will turn and the other on will move.

Question e

Answer: It depends on the relative size of jumper. If the jumper is smaller(smaller row coordinate or same row but smaller column), the jumper move first and the other one will turn. If the jumper is bigger, it will turn and the other on will move.

Question f

Answer: No, I think there are enough tests.
